ADITYA BANSAL

+91-9899161162 | adityabansal04031@gmail.com | LinkedIn | GitHub | Portfolio

Computer Science undergraduate with hands-on experience shipping full-stack, AI-integrated applications using Python, Flask, and modern LLM APIs such as Google Gemini. Strong foundation in backend architecture, relational databases, and data structures, backed by real internship experience and several independently shipped, production-deployed projects.

Education

ITS Engineering College (AKTU) — Greater Noida, India
Bachelor of Technology (B.Tech) in Computer Science Engineering — *Expected Graduation: May 2027*
– **Current Standing:** 4th Year (Penultimate Year) | **CGPA:** 7.8/10.0

Technical Skills

Languages: Python (Advanced), JavaScript, C, C++, Java,TypeScript, Bash, SQL (PostgreSQL, MySQL)
Frameworks & Libraries: Flask, SQLAlchemy, React.js, Node.js, Express.js, NumPy, Pandas, Scikit-Learn
Developer Tools & Cloud: Git, GitHub, AWS, Google Cloud, Microsoft Azure, Oracle Cloud Infrastructure (OCI)
Core Concepts: REST APIs, Multithreading & Concurrency, Scalable Architecture, Data Structures & Algorithms

Experience

Honeybee Digital — Jul 2026 – Present
Python Developer Intern
– Develop and maintain Python backend services and REST API integrations with third-party platforms, powering data flows for client-facing digital products.
– Collaborate with the engineering team to debug, test, and optimize data-handling workflows, strengthening the reliability of internal tooling.

Cognifyz IT Solutions Pvt. Ltd. — Jun 2026 – Jul 2026
Data Analysis Intern
– Analyzed a restaurant dataset of ∼9.5K records using Python (Pandas, Matplotlib, Seaborn) to identify top cuisines, city-wise ratings, and how price range relates to online delivery adoption.

CodeAlpha — Aug 2026 – Sep 2026
Data Analytics Intern
– Analyze and clean raw business datasets using Python and SQL, applying exploratory data analysis to surface actionable trends and reporting insights.

Virtual Experience & Job Simulations

J.P. Morgan Chase & Co. (via Forage) — Online | Certificate
Quantitative Research & Software Engineering Job Simulation — *Jul 2026*
– Engineered programmatic financial data solutions in Python, optimizing algorithmic execution to handle high-frequency data streams under production-like conditions.

Deloitte Australia — Online | Certificate
Data Analytics Job Simulation — *Feb 2026*
– Built interactive Tableau dashboards from raw business datasets and performed statistical data cleaning in Excel to surface business-critical KPIs.

Projects

AI Resume Analyzer & ATS Platform | *MERN Stack, Google Gemini API* — Live Demo | GitHub
– Built a full-stack ATS platform on the MERN stack that parses resumes and benchmarks them against job descriptions using the Google Gemini API.
– Designed an automated scoring pipeline that generates ATS compatibility scores and skill-gap insights to improve candidate-job matching.

Sustainable Routing Optimization System (SROS) | *Python, Flask, Gemini API* — Live Demo | GitHub
– Built a full-stack Flask app that calculates real-time carbon emissions for transit routes and suggests eco-friendly travel alternatives.
– Integrated the Google Gemini API with structured prompt engineering to dynamically parse transit data, cutting processing overhead by 20%.

Sales Insights & Analytics Dashboard | *Python, SQL, Streamlit* — Live Demo | GitHub
– Designed a star-schema ETL pipeline in Python and SQL to process and structure over 500K sales transaction records.
– Built a live Streamlit dashboard with indexed query benchmarking, reducing report turnaround by ∼40%.

Certifications

AWS: Certified Solutions Architect – Associate — *Issued Mar 2026*
Oracle: AI Foundations Associate | Data Platform Foundations Associate — *Issued Feb 2026*
IBM: AI Fundamentals with IBM SkillsBuild — *Issued Feb 2026*
Cisco: Python Essentials 1 | Python Essentials 2 — *Issued Feb 2026*
Infosys: Front End Web Developer Certification — *Issued Jan 2026*
