EDUCATION

ITS Engineering College (AKTU)

Greater Noida, India

Bachelor of Technology (B.Tech) in Computer Science Engineering

Expected Graduation: May 2027

- **Current Standing:** 4th Year (Penultimate Year)
- **Academic Performance:** CGPA: 7.8/10.0
- **Relevant Coursework:** Data Structures & Algorithms (DSA), Operating Systems, Database Management Systems (SQL), Object-Oriented Programming (OOP), Distributed Systems, System Design.

TECHNICAL SKILLS

Languages: Python (Advanced), C++, Java, C, SQL (PostgreSQL, MySQL), JavaScript

Developer Tools & Cloud: Git, GitHub, Oracle Cloud Infrastructure (OCI), Google Cloud, AWS, Microsoft Azure

Libraries & Databases: Flask, SQLAlchemy, NumPy, Pandas, Scikit-Learn, Matplotlib, MongoDB

Core Concepts: Multithreading, Concurrency, Scalable Architecture, REST APIs, Data Structures & Algorithms

PROFESSIONAL EXPERIENCE & SIMULATIONS

J.P. Morgan Chase & Co.

Online

Quantitative Research & Software Engineering Simulation

Jan 2026

- Engineered programmatic financial data solutions using Python, optimizing algorithmic execution to handle high-frequency data streams under fast-paced production conditions.
- Applied strict software engineering principles to ensure code reliability, fault tolerance, and system scalability.

Deloitte Australia (via Forage)

Online

Data Analytics Virtual Intern

Feb 2026

- Engineered an interactive data visualization system using Tableau, converting complex raw business datasets into scalable dashboards for executive-level performance tracking.
- Conducted advanced data cleaning, statistical analysis, and algorithmic filtering on large-scale datasets in Excel to identify business-critical KPIs.

PROJECTS

AI-Powered Resume Analyzer using NLP | *Python, NLP, Scikit-Learn, Git*

- Developed an end-to-end natural language processing (NLP) system to extract technical skills and programmatically match candidates with complex job descriptions.
- Designed and implemented custom keyword-matching algorithms and text-parsing pipelines, improving screening efficiency by ~50%.

Sustainable Routing Optimization System (SROS) | *Python, Flask, SQLAlchemy, Google Gemini API, Git*

- Developed a full-stack web application that calculates real-time carbon emissions for transit routes, managing concurrent user API requests seamlessly via a Flask backend.
- Integrated the Google Gemini LLM using structured prompt engineering to dynamically parse and analyze transit datasets, decreasing data processing overhead by 20%.
- Architected a relational database schema utilizing SQLAlchemy to ensure high data integrity and low-latency lookups for user routing histories.

Sales Insights & Relational Database Analytics | *Python, SQL, Power BI*

- Developed a data analytics engine using Python and SQL to query and monitor large-scale historical sales data KPIs.
- Formulated optimized query parameters to compute complex revenue trends and product performance benchmarks, reducing manual processing overhead by ~40%.

CERTIFICATIONS

AWS: Certified Solutions Architect – Associate

Oracle: Cloud Infrastructure 2025 Data Science Professional

Microsoft: Data Analytics & AI Certification

IBM: Data Analysis, Visualization, and SQL/Relational Databases

Cisco: Python Essentials 1 & 2
