

Aditya Bansal

has successfully achieved Cisco Networking Academy Python Essentials 1 course provided by Cisco Networking Academy and OpenEDG Python Institute.

The graduate has achieved:

- Design, develop, debug, execute, and refactor simple computer programs written in Python 3.
- Think algorithmically to analyze problems and implement them as computer processes.
- Use the syntax, semantics, and the most important elements of the Python Standard Library to write Python scripts and resolve typical implementation challenges.
- Understand the role of a programmer in the software development process.
- Attempt the qualification PCEP<sup>®</sup> - Certified Entry-Level Python Programmer from OpenEDG Python Institute and continue their professional development at an intermediate level with Python Essentials 2.
